EXPERIENCE

Olive Digital | Frontend & Mobile App Developer

March2025–Present

Spearheading the development of complex frontend architectures using Next.js and React.js.
Building scalable, high-performance web applications tailored to diverse business requirements.
Integrating real-time features and optimizing user workflows for large-scale e-commerce and management platforms.
Enhancing application performance, maintainability, and user experience through modern frontend best practices.

Cloud Lab | Frontend Developer

Jan 2024 – Nov 20

Developed pixel-perfect, responsive web interfaces with a focus on modern user experience using React.js.

Transformed Figma designs into functional, interactive frontend modules using Tailwind CSS.
Collaborated with cross-functional teams to ensure smooth API integration and optimized page load speeds.

PROJECTS

Collubi – Advanced E-commerce & Bidding Ecosystem | collubi.com

Tech Stack: Next.js, Python (Django), Socket.io, Stripe/PayPal.

Key Features: Developed a comprehensive marketplace with Real-time Bidding and Live Chat using Socket.io.

Implemented multi-vendor dashboards for Sellers and Buyers, including product requests, automated order management, and secure international payment processing.

ShadowMatch – Healthcare & Clinic Management System | shadowmatchuser.dev-bt.xyz

Tech Stack: React.js (Frontend), Laravel (Backend), Stripe.

Key Features: Architected a multi-role platform for Admin, Clinics, and Users.

Engineered a complex **Slot Booking System** where clinics manage availability, and users book appointments with automated email notifications and payment integration.

Rentatron – Peer-to-Peer Vehicle Rental Platform | rentatron.vercel.app

Tech Stack: Next.js, Django, Pusher (Real-time Chat), Stripe.

Key Features: Built a rental marketplace with a Document Verification Workflow (Admin Approval).

Integrated a **Dispute Management System** for user protection, real-time booking status updates, and in-app chat for owners and renters.

Head2Head – Sports Analytics & Team Builder | head2head.vercel.app

Tech Stack: React.js, Tailwind CSS, Framer Motion.

Key Features: Developed an interactive Stadium View interface with Drag-and-Drop functionality for users to create and save their custom 11-player football teams.

Implemented a comprehensive player database and a dynamic CMS for blogs and player stats management.

Orangi Store – Full Stack Multi-Vendor Marketplace | orangistore.com

Tech Stack: Next.js (App Router), MongoDB, Cloudinary, Pusher.

Key Features: Engineered a high-performance e-commerce store with built-in **SEO Optimization.**

Developed a seamless vendor onboarding flow, product management, and real-time customer support using Pusher.

Victor Design | victor-design.netlify.app

Created a sleek, minimalist portfolio-style layout with optimized asset loading and smooth transitions.
